Nicholas Moehle

Industry experience

2021–2022 **Quantitative Strategist**, *Goldman Sachs Quantitative Investment Strategies*.
I work with several investment teams to solve novel portfolio construction and backtesting problems.

2018–2021 **Research Fellow**, *BlackRock AI Labs*.
My primary role was to apply convex optimization and machine learning to practical problems throughout BlackRock, with a special interest in optimal investment problems. I worked closely with Stanford professors Stephen Boyd, Rob Tibshirani, Trevor Hastie, Mykel Kochenderfer, and Emmanuel Candès.

Selected projects:
- Built the optimization engine for BlackRock's tax-managed equity SMA product
- Created convex optimal control algorithms for retirement planning and target date funds
- Wrote a suite of statistical outlier detection tools using low-rank models for an Aladdin data quality initiative

Other achievements:
- Wrote four academic papers and four patent applications (pending)
- Gave several presentations to Larry Fink (CEO), Rob Kapito (President), Rob Goldstein (COO), and board members.
- Hosted three company-wide research seminars
- Worked closely with BlackRock thought leaders Ronald Kahn and Andrew Ang

2014 **Software Engineering Intern**, *Google*.
I implemented control algorithms for renewable energy applications.

Education

2011–2018 **PhD, Mechanical Engineering**, *Stanford University*, *GPA – 4.04*.
- Advised by Stephen Boyd
- Thesis Title: *Control of Electric Motors and Drives via Convex Optimization*

2006–2010 **BS, Mechanical Engineering**, *University of California, Berkeley*, *GPA – 3.74*.

Teaching

Instructor
- Convex Optimization I (EE364A), Stanford, 2016

Teaching Assistant
- Stochastic Control Short Course, Chinese University of Hong Kong, Shenzen, 2017
- Convex Optimization II (EE364B), Stanford, 2014
- Convex Optimization I (EE364A), Stanford, 2014
- Introduction to Linear Dynamical Systems (EE263), Stanford, 2013
- Introduction to Optimal Control Theory (AA203), Stanford, 2013
- Feedback Control Design (ENGR105), Stanford, 2013

Computer skills

Languages Python, Julia, MATLAB, C

Other Linux, LaTeX
